

## **Assignment: Student Report Card**

Practice printing variables clearly using **f-strings**.

### **Task**

Write a program that takes input from user and stores:

- Student name
- Roll number
- Marks in 2 subjects: Math and Science

Then print a formatted report card using **f-strings**.

For example, if user enters following input:

**Student Name: Troy Sharma**

**Roll Number: 4423**

**Math Marks: 60**

**Science Marks: 70**

Then output should be:

**Student Name: Troy Sharma**

**Roll number: 4423**

**Math marks: 60**

**Science marks: 70**

**Total marks: 130**

**Average: 65**
