ASSIGNMENT: Shopping cart

You are building a simple Shopping Cart system.

1. Create a shopping cart with the following items:

   "milk", "bread", "eggs"

2. Display the first item and the last item in the cart.

3. Add "butter" and "cheese" to the cart.

4. Remove "bread" from the cart.

5. Display only the first three items using slicing.

6. Convert the final shopping cart into a tuple

   to prevent further changes (make it immutable).

7. Try modifying the tuple and observe what happens.
